

June MAY-1967

PRESIDENT

JACK HARVEY, 78 Eric Street, Cottesloe 3 1327

IMMEDIATE PAST PRESIDENT & A.S.C. DELEGATE

BOB TICHBON, 8 Munsie Ave., Daglish 8 1411

VICE PRESIDENT, "REEL TALK" EDITOR & PUBLISHER

RON KILDAHL, 14, Excelsior St., Shenton Park 8 4680

VICE PRESIDENT & CASTING DAY ORGANISER.

TOM SMITH, 78, Marlowe St., Wembley 87 4701

SECRETARY

TERRY FULLER, 2, Sutcliffe St., Nedlands.

TREASURER.

DOUG SALT, 31, Lawrence Street, North Innaloo 46 3640

FIELD DAY ORGANISER.

DON WEBB, 11 Ostend Road, Scarborough

ASSISTANT FIELD DAY ORGANISER.

GEORGE HOLMAN, 12, Cargill Street, Victoria Park

ASSISTANT CASTING DAY ORGANISER.

E. SULLIVAN, Esplanade Flats, Esplanade, Scarborough.

SOCIAL ORGANISER.

LES (SNOR) TATE, 86 Central Road, Rossmoyne.

RECORDER & A.F.A. DELEGATE.

BILL UTTING, 146 Ewen Street, Doubleview 46 4545

LIBRARIAN.

DAVE LATTO, 7 Ashfield Parade, Bassendean

AUDITOR.

BOB KLEIN, 12, Ailsa Street, Wembley Downs 46 1123

NEXT GENERAL MEETING.

Our June General Meeting will be held in the R.S.L. Hall, Bay Road, Claremont on Wednesday 14th June, and will commence at 8 p.m. sharp.

INSTRUCTION PERIOD.

As we have now entered the Herring season, several of the newer members, and some of the old ones, have been asking for some advice on the best method of catching them. One of the experts!!! in this field is our old stalwart Ron Shirley. Ron has readily agreed to help by passing on any knowledge in the selection of lugs, blobs, etc., that may help. Talking of rods, quite a few of the lads get a lot of satisfaction in building their own rods from Blanks or semi Blanks (it's cheaper too) so to help them in this way we have asked another stalwart Bob Tucker to again pass on his knowledge in this field.

NEXT COMMITTEE MEETING.

Was held in the R.S.L. Hall, Claremont, and did not conclude until 11.20 p.m. Any two members are invited to attend in on any Committee Meeting, as long as prior notice is given.

NEXT COMMITTEE MEETING.

Will be held in the R.S.L. Hall, Bay Road, Claremont, and will commence at 7.30 p.m. sharp on Thursday 22nd June.

PLEASE NOTE CHANGE OF HALL.ANNUAL PRESENTATION DINNER AND DANCE

SATURDAY JUNE 24TH, HARPER HALL, HAY ST. EAST
(NEAR MINT.)

\$ 6.00 PER COUPLE.

CASTING-DAY CHANGE OF DATE.

Owing to casting day falling on the long weekend in June, our usual casting day, it has been decided to hold Casting on the following weekend, June 11th commencing at 9.45 a.m. sharp.

SUBSCRIPTIONS.

Subscriptions for the ensuing year shall become due and payable at the Annual General Meeting in each year.

Any member whose subscription is in arrears for three consecutive months shall be deemed to be unfinancial, and the Committee, without further notice, may terminate the Membership of such person.

Senior Nominations \$6.00, Subscriptions \$6.00, Junior Subscriptions \$2.00.

NEW COMMITTEE VACANCIES.

Just a reminder members that in only a few short weeks your election of officers is due to take place once again, and it is up to you, to elect the officers of your Committee. This is very important and most serious thought needs to be given. Please do not forget that all applications for Committee must be in writing before the election.

There are several vacancies, these positions will have to be filled, so give it some thought. Ask your mates whether they would like to go on Committee, or maybe yourself would - it's an interesting job as well as doing a bit for your Club. Every vacancy will have to be filled, for we don't wish to overburden the willingness of present Committeemen. If you would like to come on Committee we guarantee you a job - you will not be just a name.

Elections will be held July General Meeting.

DRY CASTING NEWS - MAY 1967. This week brought the opening season for drycasting 1967/68. Fine sunny day with light prevailing wind made conditions favourable. It was good to see Ron Shirley back with us again - possibly with some casting practice the fish might start biting again? Also pleased to see many new faces which augers a good start for the coming year. We were happy to welcome three visitors who were pleased to receive a little tuition on correct way of using gear - they showed their appreciation by leaving a small donation with us.

In the D.H. Accuracy our congratulations must go to Ken Jones on achieving a score of 72/80 with weighted line. Several years ago this event was cast using a spinner when Noel Knight obtained a score of 72/80. We now have two members with this record - one with a spinner and one with a weight. Second place goes to Alan Burnett with a good score of 63/80, and third was Bill Utting with 58/80.

In the L.L. Distance longest cast was made by N. Knight with 388 ft. This event was won by R. Tichm. S.H. Accuracy - Top score was made by A. Burnett with 24/40, second N. Knight 23/40, and a close third was two members D. Webb and G. Holman, each scoring 22/40.

The overall winner of the day was Alan Burnett with 117 pts.

NOTE: Events for next drycasting will be held on SUNDAY 11th JUNE at 9.45 A.M. SHARP. (owing to the first Sunday falling in the long weekend). Events will be L.L.DISTANCE, D.H. ACCURACY, S.H. ACCURACY, OPEN S.H.

June 11th drycasting will start promptly as we wish to have some time for instruction in the handling and use of heavy shark gear as many members have this type of equipment and do not know how to cast. Doug Savage who has been fishing with this gear will be pleased to give pointers. We would be pleased to hear of any other member who is clued up in this way. Bring along your tackle and learn how to cast it out.

T. SMITH, E. SULLIVAN,
CASTING DAY ORGANISERS.

GARDEN ISLAND - MAY 1967.

A kind week-end, weather-wise, brought a total of 43 members and visitors to the venue, and it was a welcome sight to see one or two of our less frequent Field Day members on the job.

Few ventured to the North End, and as it turned out, the vicinity of the Rifle Range beach turned out to be the hot-spot as was proved by Hew Hoy Yew's splendid effort, backed up by George Holman and Stefan Knezy, who all broke the 20 lbs. barrier.

Salmon were scarce, but Trevally seemed plentiful in certain spots, with a fairly mediocre showing from the Herring and Tailor. Conditions were not ideal, with little wind and calm seas.

However, members, heard laughing long and loudly from the huts, seemed to be enjoying life, and the lack of fish for some caused few long faces.

The rather awkwardly fitted out boat was loaded and unloaded very efficiently by willing hands, but a word to those whose gear was held together more by luck than judgment. Well packed gear is essential, and to those who use those gaping bags and leave their shoes etc., precariously balanced on top, don't be too surprised to see them floating sedately downstream one of these days. Cord or string is cheap, so let's see some more of it used fellers!

See you all at Tim's Thicket next month, and to those who missed out this month, better luck next time!

D. WEBB, F.D.O.

SUBS.

THE

SPON

GAME FISH.

If any member is lucky enough to catch a Game Fish, please let the Recorder know. If it is your first game fish, please enter your fish on an OPEN competition form, as you will then be entitled to a much prized Game Fish Badge.

New names to be added to the list and entitled to Game Fish Badges which are presented at our Presentation night on June 24th

| | | | |
|------------|-----------|-------------|---------------|
| D. Bodle. | B. Hanks | Hew Hoy Yew | D. Hollard |
| T. Horsley | R. Hunter | R. Tichbon | G. Newton (J) |

We now have 41 names on our list of members who have caught Game Fish. The fish total has grown by 30 this year. 179 fish have now been caught by members.

| | | | | |
|-------------|------|----|----|------------|
| TOTAL UP TO | 1963 | - | 50 | |
| | 1964 | - | 27 | |
| | 1965 | - | 18 | |
| | 1966 | -- | 54 | |
| | 1967 | - | 30 | TOTAL 179. |

This is something the Club is extremely proud of, as it is not long ago that it was thought impossible to catch Game fish with our gear.

BILL UTTING, RECORDER.

SINGLE HANDED RODS. In all single handed events, both fishing and casting, the S.H. Rod must be cast with ONE hand only.

SUBSCRIPTIONS. A gentle reminder that Subs will be due June 30th, our nearest General Meeting to this date is July. Members shall be deemed unfinancial if three months in arrears.

SENIORS NOMINATIONS \$5.00, SUBS, \$6.00 JUNIOR SUBS \$2.00

A FEW NOTES ON FISHING GEAR FOR NOVICES.The fishing rod.

These are best manufactured from a reputable hollow fibre glass and should be, ideally, between 11 ft. 6 inches and 12 ft. long. The length is quite important, as the rod is used to cast the hooks, line, and sinker from the beach into the sea, and therefore must have the necessary amount of 'whip'. Great distances may be obtained with expertise, and casts of 200 yards are common, provided the caster is expert enough to break the line at the rod tip simultaneously with the forward whip of the rod, completely unimpeded by the line, and as I remarked, great distances may be achieved.

The Reel

This is a device designed to carry your line in coils around a central drum or spool, which is attached to a set of gears and operated by a handle, enabling the angler to rewind the line onto the spool after casting. Only the best reels should be used, as the spool must have good balance and free running bearings. Good bearings are a must, as a sticking spool makes it impossible to obtain an 'over-run' and a subsequent 'birdsnest' when casting. For this reason fixed spoolreels should never be used, as, with this type of reel, it is possible to accidentally cast off up to 100 yards of line which has to be reeled in, and this is timewasting.

Fishing Line.

Most anglers prefer to use Nylon line and for several good reasons. 1. In direct ratio to the breaking strain of the line, it is possible to wind a much greater length of line onto a given spool, and this has the obvious advantage of enabling the angler to obtain much larger 'birdsnests' from the over-runs.

2. Nylon line is much easier to break and furthermore it breaks more cleanly than linen or other natural fibres. The clean break assures the angler of maximum distance for hooks, trace and sinker when 'breaking off'.

3. Nylon is almost invisible under certain conditions, and this assures you of three times the difficulty when sorting out the 'birds nests' when they occur. Sitting doing this is much less tiring than continually running to the water's edge to cast.

Hooks.

These are absolutely essential to good angling, and expert anglers will tell you that 5/0 to 6/0 limerick hooks are best. When used they are usually ganged together, two or three to a rig, and to obtain maximum efficiency a treble hook is attached to the bottom limerick.

Experienced anglers can pierce a fellow angler's ear from twenty yards and without even looking round to take aim. Less energetic anglers wait until after dark and stick their rods into the sand at a angle of 45°, and with the rig hanging from the rod tip at the most appropriate height, wait for their victim to walk into it. (I always feel that this method is a bit unsporting, as no real skill is involved).

We then come to the retired Army land mine expert, who drops a set of hooks onto the beach and neatly flicks a layer of sand over them. He may have to wait longer for the results, but someone is sure to tread of them. The real disadvantage here is that your victim may be wearing waders and tearing the waders without drawing blood from the foot is a sheer waste of effort.

The Sinker.

This piece of equipment fitted to the line just above the trace is ostensibly designed to hold the line on the bottom. There are many types, so we shall note only the two most commonly used by beach anglers.

The Star sinker, A pointed, 3 or 4 angled triangular job is ideal for inflicting the greatest amount of pain to other anglers in the vicinity. Most anglers of experience cast directly overhead, and so achieve their two or three hundred yards or so. However there is the more talented angler who casts sideways with a round arm action. With this action the angler can break off prematurely, and clobber someone as far as 100 yards along the beach. Injuries sustained from star sinkers have been known to disable an angler for periods in excess of 6 weeks. A truly notable achievement!

The second type, known as the Spoon, is far less efficient,

due to the flatness of its design. It is necessary to strike the victim with the edge to obtain good results. Blows from the flat surface of these sinkers cause only major bruising, and the result is hardly worth the effort.

The Rod Bucket.

This is a leather device and when used is strapped around the waist with the 'bucket' hanging in the appropriate position to take the rod butt. These are mainly used by experienced anglers who are unable to achieve a 'break-off', 'over-run' or the impaling of a fellow angler. They are, of course, more widely used by anglers who favour the fixed spooltype reel, and have the misfortune to see their hooks, line, and sinker fall, still intact, into the sea.

The Fish Knife.

A cunning tool, with a sharp cutting edge on one side, and on the back a series of serrations, (claimed to be ideal for scaling.) These tools are ideal for sticking into the sand leaving approx. 3-4" of blade exposed. They are most effective when kicked by a bare-footed angler on the cutting edge, and if correctly positioned and well sharpened, amputation of the small toe can be guaranteed, at least. Should the knife be unfortunately kicked from the back however, the serrations are designed to inflict a deep ragged gash in most feet, and tears off 6" or more in rubber waders would be the minimum damage. Definitely a MUST for all anglers!

The bait.

Experienced anglers use small fish called Mulies, but of course, there are other varieties such as Mullet, Squid and Octopus etc. Mulies are the most popular, and when bought are usually frozen. If unwrapped and thoroughly thawed before use, they will fly off the hooks without fail at almost every cast. For this reason most other baits are avoided due to the much greater difficulty in getting them to leave the hooks before they hit the water. Should the angler find he has bait left over when fishing, it is recommended that they be spread around the beach well above the high water line where they will putrify and create a much more acceptable stench than they would if thrown into the sea or given to other anglers.

HANDICAPS REDUCED.

N.Knight 97 - 15 = 82
 R. Tichbon 180 - 12 = 168

Members must cast, hook, and play to the gaff point unaided, any fish which is entered in any division of the Fishing competitions.

Fish hooked before Field day times, CANNOT be played into the Field Day competition, e.g. a fish hooked 3 minutes before starting time of Field Day and landed 2 minutes past starting time, can only be entered in the OPEN division, but hooked 3 minutes before end of F.D. and landed after hours IS eligible for F.D. DIVISION.

TIM'S THICKET VENUE - JUNE 1967.

This venue will be confined to a distance of 5 miles North and South.

The turn-off is approximately 1 1/2 miles along the Old Coast Road to Bunbury, over the Mandurah Bridge.

Sign posts will be erected to mark the Club Tent and weigh-in point.

Fishing will commence at 4-00 p.m. and will cease at 8 a.m. Weigh-in will take place at Club Tent from 9 a.m. to 9-45 a.m.

NOTE: The Club tent will be erected at a convenient position along the lower track, and members are advised not to attempt the hill at end of gravel road. The lower track turns off to the left, just before the hill is reached.

FEES: Seniors 20 cents sweep, 10 cents registration.
Juniors 10 cents sweep.

All members are reminded that casting instruction is available to any member on Casting Days. A quiet word to the Casting Day Organiser, and he will tee up a suitable instructor for any type of casting that a member desires to brush up on.

cont. from page 9.

Final Word. Any angler who is unfortunate enough to see his bait, hooks, line and sinker drop, complete, into the sea whilst fishing and is even more unfortunate in that his bait and hooks are swallowed by a fish, I can only suggest that the Star Drag be fitted to your reel, be tightened down as hard as possible. This will lock the line and with any sort of luck the fish will be off. Should this method prove ineffective, you will find it absolutely necessary to reel the fish in to the beach. Do not be unduly discouraged, IT MAY ONLY HAPPEN ONCE IN YOUR LIFETIME!! (ANOTHER LETTER SIGNED 'DESPERATE' (ED.)

APPLICATIONS FOR MEMBERSHIP.

The following applications for membership have been received and accepted.

SENIORS.

RUDOLF LERCH,
107 RAVENSWOOD DRIVE,
NOLLAMARA .. W.A.
