NEXT GENERAL MEETING.

Our May General Meeting will be held in the R.S.L. Hall, Bay Road, Claremont, on Wednesday 10th May, and will commence at 8 p.m. sharp.

INSTRUCTION PERIOD.

As it is quite a while since we have had a question and answer night, this period will be devoted entirely to this subject, so if any member, old or new, has any question on gear like how to rig up for herring, salmon, Mulloway, or tailor, this will be the time to ask, also if any member wants to know how the scores or handicaps are worked out at casting, just ask one of the Committee men or older members. They will be too happy to fill in any details you are not sure of.

LAST COMMITTEE MEETING.

Was held in the R.S.L. Hall, Bay Road, Claremont, and did not conclude until 10.20 p.m. Any two members are invited to sit in on any Committee Meeting, as long as prior notice is given.

NEXT COMMITTEE MEETING.

Will be held in the R.S.L. Hall, Bay Road, Claremont, and will commence at 7.30 p.m. sharp on Thursday 18th May.

DRYCASTING NEWS - APRIL 1967.

This month's drycasting day brought to the end of the season the close, with twenty two members present, and five visitors who were seen up the far end receiving instructions on how to use their gear. This instruction is available to anyone upon request.

The morning was very pleasant, but apparently we had a breeze to cast against, as many of the members found that their casting in the Level Line distance was not as good as usual. The lines were seen drifting down many seconds after casting. In this event, the longest cast was made by W. Bridger with 375 ft., but was won by R. Holland.

In the D.H. Accuracy - this was set out at the longest distance for the year, and a few of the boys took a while to get their eye in and adjust to the distance. This was won by W. Bridger with 51/80, K. Jones second with 41/80, and M. Dawson with 39/80.

In the S.H. Accuracy, R. Tucker came in as winner with 27/40 followed by Hew Hoy Yew with 21/40, and W. Bridger with 20/40.

Overall winner for the day was W. Bridger with 105 points. Our heartiest congratulations go to the first three members with their top scores as follows : -

R. Tucker	1st	1217 points.
A. Bunnett	2nd	1142 "
W. Bridger	3rd	1085 "

As this is the close of the season, your organisers would like to say thank you to all members who attended and co-operated so willingly, and to those who helped in setting out courses when necessary. It has been a most enjoyable year, and we look forward to seeing you all again in the forthcoming year which will commence on -- SUNDAY MAY 7TH 1967 at 10 A.M.

EVENTS -- L.L.DISTANCE, D.H. ACCURACY, S.H. ACCURACY.

In future S.H. events, the ribbon to be used will be shortened to six inches of 1/2 inch tape instead of 12 inches, and of course swivels may be used.

NORRIE CROSS TROPHY.

W. Bridger.

YALLINGUP - APRIL 1967.

Despite the promise of gale force winds, lashing rain and rough seas, the attendance was excellent with fifty members and visitors (notably our friends from the Collie Club) appearing on target.

We were, I am sure, pleasantly surprised to find almost cloudless skies and a mild breeze all that had to be contended with. Most popular beaches were virtually unfishable due to shallow water, heavy swells and a certain amount of heavy weed, and accordingly most went to the rocky areas where it was possible to fish in a certain amount of comfort.

The Club tent was set up at the usual spot and by the time yours truly had arrived, our President had booked in a large contingent (thanks Jack).

Probably the most popular spot was the shore end of Canal Rocks where reports were that Salmon were biting freely. On arrival at this area it was obvious that there was very little room on the safe rocks and word was out that Tommy Vivian and Brian Hanks were among the Salmon.

Jack Harvey, Jim Strong and others were preparing to give the herring a go from the shore to the North of the rocks, and George Holman and Alan McLauchlan were having the success and the Salmon were coming along in twos and threes as from our vantage point a sudden burst of activity was observed at intervals, with rods bent and gaffs flying, and then, all quiet for a spell.

Just a point of interest, the fellows fishing from the beach rocks, shore side of Canal Rocks were having no success with Mulie bait, but a spinner cast well out and trolled very slowly accounted for three salmon, so don't despise the spinners, they do work.

As the evening wore on, we were informed of 9 Salmon to Tommy Vivian, 5 to Brian Hanks and many others with 2 or 3 each, and whilst there were no fantastic individual catches, each member was getting his share.

Two or three members were smashed up by a marauding shark and sundry salmon attacked while on their way to gaff, but he was too big

contd.

or too wily to be caught himself.

The following dawn the rocks were once again populated by members, but disappointingly the Salmon were no longer very much in evidence, and even the herring, after being thick at dawn, very soon disappeared. Two or three Salmon were hooked in the cans proper, but none were observed being larded in the bay.

A further large fish smashed one or two rigs at about 7 a.m., but by 8 a.m. it was obvious that we had had it.

As usual, the weigh-in time had us wondering what was coming to scales, and the high light was, I am sure, Eric Sullivan's 55 lbs. of herring (anyone who works that hard deserves what he gets!)

Now just a few points of interest. This was, of course, virtually our tenth anniversary field day, and we broke a few records. 904 lbs. total catch - an alltime record. $4547\frac{1}{4}$ for the year - another record, and they will both take some beating!

A total year's attendance of 537 members and visitors, an average of 44 members per venue. Next month we begin our New Year, so Happy New Year, and bigger and better fish - and let's make this year's records look a bit sick.

We were glad to have the Collie Lads along with us, and we hope they had a good field-day, and we certainly enjoyed their Company. We hope to see them with us again from time to time.

As a final word, I would like to say how much I have personally appreciated the co-operation and help that members have extended to me in my first year as F.D.O. I've made a few mistakes, but no one has complained. Believe me, it's not as easy as our previous Field Day Officer Jimmy Strong made it appear, but after 8 years at the job, he was an expert!

Thanks again fellers, and I hope you get in amongst 'em next year.

DON WEBB, F.D.O.

PLAYING THAG BIG FISH.

Fish that are lost when once properly hooked are usually lost because of the following reasons:-

- (a) Bad Knotting. The answer to this fault is obvious, learn to tie your knots properly and use the right knot.
- (b) The line being bitten through by the fish. The answer, of course, being the use of ganged hooks or a wire trace.
- (c) The line being cut or frayed to breaking point on rocks etc. or the rough sides of the larger fish or sharks. The use of a heavier leader helps to overcome this.
- (d) The hooks being pulled from the fishes mouth by the angler adopting bullocking tactics. It would not be exaggerating to say that 50% of fish lost are lost because of one or both of these reasons.

This is where the correct drag setting used on light line makes it far easier to keep a constant and steady tension on your fish, and obviate that sudden jerk which tears the hook free. When fishing it is advisable to keep your drag as light as is reasonably possible, always check before commencing to fish. With your anti-reverse lever set ON, and with the line hard, if the spool turns too freely, tighten the drag setting and jerk again to check. Only experience will tell you when a drag is nicely adjusted, but until then, remember that a lightly set drag will lose less fish than one set too tight.

As a fish is taking out line and the spool empties, so the drag automatically increases with the decrease in the diameter of the spool. This is probably best explained as considering the radius of the spool as the length of a lever operating the drag. As the length of the lever shortens, owing to the line being taken out, so greater effort is required to operate the drag.

In concluding, get to know the controls and adjustments on your particular Reel. Try them all, get the feel of making each adjustment. Equally important, learn what NOT to attempt to adjust. Do not force any control or adjustment. If it is done correctly, it is done easily.

Have you notified the secretary of your change of address?

Members must cast, hook, and play to the gaff point unaided, any fish which is entered in any division of the Fishing Competitions.

Fish hooked before Field Day times, CANNOT be played into the Field Day competition, e.g. a fish hooked at 3 minutes before starting time of Field Day, and landed 2 minutes past starting time, can only be entered in the OPEN Division, but a fish hooked 3 minutes before end of Field Day and landed after hours, IS eligible for F.D. division.
