

October 1980

OFFICIAL PUBLICATION OF THE SURFCASTING & ANGLING CLUB OF W.A. (INC.)

CLUB OFFICIALS:PRESIDENT:

Publicity Officer
1st Proxy A.A.A.
Brian Leicester,
11 Bromley Street,
Embleton. 6062
Phone 2719035

VICE PRESIDENT:

Eric Parker,
9 Minilya Street,
Innaloo. 6018
Phone 4468249

SECRETARY:

Peter Osborne,
79 Davillia Road,
Duncraig. 6023
Phone 4479478

TREASURER:

Barrie Waddams,
68 Gummow Way,
Girrawheen. 6064
Phone 3423167

FIELD DAY OFFICER:

Tony Richardson,
7b Etna Place,
Rossmoyne. 6155
Phone 4576004

ASSISTANT FIELD DAY OFFICER:

Wilf Core,
28 Burgland Drive,
Girrawheen. 6064
Phone 3422407

DRYCASTING OFFICER:

Graham Reeley,
52 Kirwin Way,
Lockridge. 6054
Phone 2793914

ASSISTANT DRYCASTING OFFICER:

Gordon Tompsitt,
31 Cobb Street,
Scarborough. 6019
Phone 3414424

SOCIAL ORGANISER:

Sid Whiting,
34 Bertram Street,
Dianella. 6062
Phone 2751904

PROPERTY OFFICER:

Immed. Past President,
A.A.A. Delegate,
George Holman,
32 Lyndhurst Street,
Dianella. 6062
Phone 2768976

LIBRARIAN:

Bob Foreman,
8 Gummow Way,
Girrawheen. 6064
Phone 3425222

RECORDER:

Laurie Cook,
53 Tendering Way,
Girrawheen. 6064
Phone 3421440

A.A.A. DELEGATE (PROXY)

August Sussmayer,
7 Fell Place,
Wembley Downs. 6019
Phone 3413698

AUDITOR:

Mr. R.G. Klein,
Unit 5,
1 Robin Street,
Menora. 6050
Phone 2711798

REEL TALK EDITOR:

John Reeley,
18 Farmfield Way,
Morley. 6062
Phone 2797373

ASSISTANT REEL TALK EDITOR:

Tony Richardson
Phone 4576004

LIFE MEMBERS:

D. Brown, N. Knight
V. Davis, J. Strong
R. Kildahl, D. Edwards
L. Dunn

HONORARY MEMBERS:

K. Jones
D. Retallack

Oct 1980

Forget-Me-Knots...

- Casting day FIRST Sunday of Each Month unless otherwise noted. - Starting Times will be Strictly adhered to.
- Monthly General Meetings are usually held on the SECOND Wednesday night of each month at 8 p.m. SHARP.
- Field Days are held generally on the Weekend after the General Meeting.
- Annual Dinner Dance and Presentation of Trophies is held in June. Time and Place to be determined.
- OPEN: Club Records: Line Ratios Badges applications must be in to the Recording Officer within 30 DAYS of Capture.
- Give your Committee any ideas you have. Don't sit on them.
- All Library Books MUST be returned at following Monthly Meeting unless permission is given to hold books longer.

NEXT GENERAL MEETING:

Wednesday, 8th October, 1980 at the Dianella Community Hall, Light Street,
Dianella. 8 p.m. sharp.

INSTRUCTION PERIOD: Talk on preparation for trip to Steep Point.

NEXT COMMITTEE MEETING:

Wednesday, 15th October, 1980 at the Dianella Community Hall, Light Street,
Dianella. 8 p.m. sharp.

NEXT DRY CASTING DAY:

5th October. 9 a.m. sharp.
Up to 112 grams
Up to 112 grams artificial bait
Plus usual accuracy events.

OCTOBER FIELD DAY:

Wagoe. L.W.E. 11/12/13th.
Boundaries- Horrocks - Wagoe Cliffs
Sign on - Lucky Bay Settlement - 1 p.m. start
Weigh in - Same place Sunday 12 noon, Mon. 10 a.m.

NOVEMBER FIELD DAY:

White Hills/Preston. 15/16th
Boundaries - White Hills Entrance-Preston Entrance
Sign on - 1 p.m. Saturday, White Hills turn off
Weigh in - 10.30 a.m. Sun. same place

FIELD DAYS 1980/81 SEASON:

| | | | |
|-----------|------------------------|----------|----------------------|
| November | White Hills to Preston | February | Wedge |
| December | Open | March | Denmark/Wago (split) |
| Jan. 1981 | Greenough | April | Rottnest |

Jim Strong

Stan Renshaw
Ron & Lois Kildahl
George & Les Holman
The Osborne Family
Trevor Stam
Graham Reeley
Keith & Kit
Wilkerson

REPORT FROM THE PRESIDENT:

Well members we have began this official year with seven new faces on the Management Committee, it is this mixture of old and new which lends itself to good management for the club. Thanks must go to all those members who were unsuccessful for forwarding their names for the election. Please do not feel disappointed, but try again next year.

Fran and myself travelled to Kalbarri for a week's holiday at the Club's home. On arrival we found the house in a run down condition, so we set sail to rectify the problem. We painted, scrubbed, washed, pulled up old lino, relaid new lino, fitted new towel rails, fitted fluorescent lights to laundry and front verandah, removed double gee plants, cut down trees, took 4 trailers loads of rubbish, repaired and replaced taps, fitted safety chain to front door, shifted fridge and freezer along with many other chores.

The house is now clean and well set up for those who wish a relaxed holiday. The house only requires now to make it a more viable proposition, is a double bed and a good quality lounge suite. Anyone having any of these articles and would like to donate them to the club, please contact George Holman, our Property Officer.

SELLING THE CLUB HOME.

After discussions with property dealers in Kalbarri, plus noting the amount of homes on the "FOR SALE" market, with little movement, the Club would be foolish to sell its property at this point of time. Figures from the booking offices or agents in the town indicate that people are still prepared to travel the distance to Kalbarri but instead of booking for one week only are opting for two or more weeks. Many new unit developments and homes are still being built, so the major developers still have faith in the town.

It was most evident that they are on the right move as Kalbarri over the August holidays plus the week prior was completely booked out. Even the new caravan park located behind the motel was full to capacity with tents set up in the scrub.

I consider this club would be served better by holding onto the home for at least one to two years longer when sale prices become better and selling easier, especially now as the house is up to better standard.

I feel the club must send members to do a thorough cleaning once every 12 months or so, so as to keep it up to the standard required.

Remember we must rely on the public for our clients, as our members seldom book.

Many thanks must go to Fran for the work she carried out cleaning up the place, she worked extremely hard in this club's interest. Secondly a big thank you to a friend of mine, John Greenfield of Geraldton, who came up to Kalbarri for a couple of days holiday and ended up transporting the new lino up from Geraldton, helped me with lifting the old and laying the new lino. John also fitted two fluorescent lights, one in the laundry and one on the front verandah, donated the wire and fittings (switches). John, on behalf of the club, I would like to thank you for your assistance, it was greatly appreciated.

PRESIDENT'S REPORT CONT'D:LIFE MEMBERSHIPS:

The Club has chosen to award life membership to two of the club's hardest workers, namely Bob Klein who has served the club for many many years as its official Honorary Auditor, and George Holman who lives and breathes S.C.A.C., George's contribution to this club has been in many positions with the peak of his service as President for 3 consecutive years.

The club owes a great deal to these two wonderful club members. The Committee and Members congratulate you both and consider it an honour to have two such people as yourselves as Life Members.

Our new Social Organiser, Syd Whiting, is setting up a new list of social outings, so would all members please assist with their success by attending all functions possible.

Brian Leicester
President

.....

SURVIVAL (Part Four) by Basil Marsh

This month I want to take a look at survival from a different angle. The requirement of the human body for water, particularly in relation to a man possibly lost anywhere on the hundreds of miles of inhospitable West Australian coast.

Survival depends on an adequate supply of drinking water. Emergency rations are of little value without water.

A man can expect to survive for about three weeks on water alone. In areas with high temperatures a man without water and resting in the shade can expect to live from two to five days. If he rests during the day and walks at night, this period is reduced to one to three days. This expectancy of life increases with cooler conditions but it is generally accepted that the life expectancy of a man without food and water, resting in shade at all times is, at the outside, ten days. Therefore, it is necessary to use water intelligently, especially if water is scarce.

If water is plentiful, thirst should be quenched at all times. In fact more may be beneficial provided it does not result in discomfort, or restriction of body movement. It is a fallacy that water taken during the heat of the day is immediately lost through an increase in the amount in sweat. Water and Salt intake.

These are required in quantities sufficient to replace amounts lost in sweat and urine. Under conditions of heavy perspiration, as much as a pint of water an hour is required and the average man doing an average days work in hot climates needs about twelve pints daily. The best indication that enough fluid is being drunk is the passage of urine. If an individual is passing more than a pint of clear urine in the twentyfour hours, it may be assumed that he is taking enough fluids.

SURVIVAL CONT'D:

There is enough salt in normal foods to balance that normally lost and in hot climates it is generally advisable to increase the salt intake only on a doctors advice. This could be done by taking extra salt with meals and by adding salt to drinking fluids. Salt added to the strength of two level teaspoons to the gallon is hardly perceptible to the taste.

No economy can be achieved by reducing the consumption of water below that required to cover minimum losses from the skin, respiratory tract and urine. The deficiency would be made good simply by the withdrawal of water from the body tissues, to their detriment.

Water Conservation.

A man walking in the sun in tropical conditions may lose up to twenty pints of water, mostly in the form of sweat. In shaded or more temperate conditions, the loss may be up to sixteen pints a day. Either this water must be replaced or steps taken to reduce the loss.

During a period of twentyfour hours, a man sitting exposed to the sun in the open may lose up to ten pints of water, mostly in the form of sweat. Losing water at this rate, where supplies are limited to one or two pints per day, could bring about death by dehydration in about three days. Physical exertion would increase the loss which could reach twenty five pints or more for a man working strenuously under tropical conditions. This would be almost entirely a sweat loss, the urinary loss being only about three quarters of a pint.

There are several ways in which body water can be conserved. In the first place, when water is available but in not sufficient quantities, none should be consumed during the first day unless the sweat loss during this period is excessive. This is most important because, initially, the kidneys may not be conserving water fully and this will ensure that water consumed later will be used more economically. On subsequent days, the whole allowance may be consumed every day, preferably in small amounts at frequent intervals.

Further conservation of water may be effected by preventing the body from becoming hot. When the amount of heat, absorbed by the body through sitting or moving about in the sun or produced in the body by physical exertion, reaches a certain level, an involuntary attempt will be made to reduce it by the production of sweat. This sweat on evaporation from the surface of the skin, has a cooling effect, but the environment must be dry enough to enable evaporation to take place. By this method of cooling the body, considerable amounts of water may be expended as previously indicated, hence, if there is already a water deficit, sweating would cause it to reach a dangerous level much more rapidly.

There is little benefit to be gained by drinking urine. During the first day without water, urine could perhaps be consumed to advantage but there is nothing to be gained from drinking urine after it has become maximally concentrated. You would merely be requiring the kidneys to repeat work that they had already done.

SURVIVAL CONT'D:

Inadequate protection from the sun may cause severe sunburn. Apart from being very painful, the resulting blister may cause further loss of body water and, when water is restricted, reduce the period of survival.

Chewing a button or other small object may, for awhile, assist in keeping the mouth moist, as the jaw movements increase the salivary flow, but will give no real benefit during a shortage of water. Likewise, smoking is of no benefit and may result in an uncomfortable dryness of the mouth.

Sea Water.

When a lost person has insufficient drinking water, and he is in a state of dehydration, his condition is made worse by drinking sea water. There are popular accounts of men having drunk sea water for various periods but there are no records of how much better they would have been if they had not consumed the sea water or to what extent their judgement was impaired.

Next month I shall talk about finding water for drinking.

.....

FIELD DAY ATTENDANCES:

Our Field Day Officer is rightly concerned at the poor attendances at field days by club members. Here are my thoughts on the situation.

Club membership stands at a bit over one hundred members who make up the following groups:

- . A group of members who will be in attendance wherever the venue is and irrespective of the weather conditions.
- . Some members who are only interested in chasing big fish on long range trips and so devote all their resources to this.
- . Members who cannot afford to go on long expensive trips and therefore only fish the short range field days.
- . Family groups which include a few juniors who will only be taken on a field day when the weather is suitable.
- . An increasing number of fellows who have been in the club many years, now getting a bit long in the tooth (if they have any) and only attending field days on odd occasions.
- . A few members who are mainly interested in dry casting and rarely attend a field day.
- . Some members who, because of business or private commitments, can only attend field days now and again.

There is no compulsion in the club rules to attend any particular type of activity and hopefully things will always be the same. If it is considered that the main purpose of the club is to go fishing then the following suggestions are tendered in an endeavour to increase the field day fishing attendances.

FIELD DAY ATTENDANCES Cont'd:

IX

- A recruiting drive to increase club membership to say two hundred. A spin off from the increased numbers should be an increase in field day attendances, club finances would also benefit considerably.
- Weigh-ins times on land based field days be extended to 12 noon. It is exasperating on Sunday morning of a field day to have to rush around at 8 o'clock packing up to get back in time for the weigh in. There would be two advantages in a later weigh in. Firstly a leisurely pace could be set by those who did not wish to fish later in the morning. Those who like to fish late in the morning will have the opportunity to catch fish and thereby get a bit more value for the high expenses involved in the trip. If during the Saturday sign on it is obvious that the weather will be inclement, then by mutual consent, the weigh in time could be brought forward.

FISHING HINTS:

When making up sufficient rigs to carry with you on a fishing trip, obtain some pieces of alfoil from the kitchen, 6 inches by 3 inches. Fold the ganged hooks or place the single hook on one end of the foil and fold it over. Loop the leader line, place it on the foil and continue folding it over. The rigs in the foil can be placed in a pocket without danger of the hook points causing problems and if you have a breakoff a complete new rig is immediately available.

To protect and preserve for years of life leather gear such as belt, rod bucket, knifesheath, rub a good supply of dubbin into the leather three or four times a year.

To stop line twist developing when using an Alvey Reel, each time the line is retrieved from the water after a cast, lift the sinker by hand to take the weight off the line and the twist will spin out at the swivel.

It is often difficult to thread line through a wooden blob which has had a hole drilled through the side to hold burley. A length of drinking straw pushed in for the length of the line hole will make the job easy. It may be necessary to drill out the hole a bit larger to accommodate the straw.

Always carry a couple of old motor spark plugs in your sinker bag. When fishing reef country where you are likely to lose rigs, the use of a spark plug reduces the cost. On line up to fifteen pounds breaking strain, a spark plug sinker makes for excellent casting.

Tiddly Marsh

SEPTEMBER CAST:

This is how my team went on (Father's Day) a dull rainy day.
Good to see the young Juniors having a go.

Double Handed:- The Juniors and Ladies started well. Scoring was quite good with Peter Osborne (42), Chinaman Hew (37) followed by Sharon Osborne (26).

We all know how "King George" did not go so well last month, well this time it was Beth's turn, going down scoring (8).

In the Juniors, Chris Waddams (29), Jo-Anne Tompsitt (19), Heather Osborne (14). Well done Juniors, the weather was not the best while casting.

Single Hand:- (What happened to our Chinaman Hew (8)?, Heather Osborne scored 21 followed by Dad Osborne (18).

Level Line: Well done Laurie Cook (478), Ray Bellgard (407).

Laurie Cook and I did the scoring. We received plenty of complaints. Our excuse was we could not see the sinkers at all. (Sorry).

Thanking all castors for helping out.

Gordon

P.S. It's good to see Alan Carr and son at casting.

.....

SEPTEMBER DRYCASTING REPORT:

Attendance was 29 Seniors, 6 Juniors, 1 Visitor.

The winner of the day was S. Renshaw with 138 points followed by G. Gildersleeve 127 points.

H.H.Yew did it again, breaking the 56 gram. It's a new Club Record, 150 metres. The old record was 142 metres.

G. Holman had his first B/O in about 5 years and having a cast after casting was over, he put down a cast of 164 metres on 56 grams.

G. Holman winning the 112 gram, followed by G. Gildersleeve and E. Parker.

B. Frederick down casting after his illness, great to see him again.

B. Leicester started the day with 2 B/Offs and in the D/H Accuracy got 2 Bullseye and in the S/H Accuracy, 1 Bullseye, but didn't finish the day in great note, with a total of 102 points.

Thanks must go to Les Holman and Gordon and those who gave a hand.

Next cast will be on 5th October, 9 a.m. start.

Graham and Gordon

(Min. 2kg)
M. Thompson, Venus Tusk Fish, 4.3kg, Steep Point

(THIS IS A CLUB RECORD)

.....

SOCIAL ORGANISER'S REPORT:

Nothing new to report this month. The next meeting will be last one before the Cabaret on October 18, so don't forget to-

- a) come to the meeting
- b) bring some money
- c) buy tickets for you and your friends
- d) bring your goodies for the hamper

If you can't make the meeting, you can pick up your tickets from the next Drycast (providing you have your Reel Talk by then) or any time by contacting me at home.

Tickets are also available now for the River Cruise on February 7. It may be early yet, but at \$9 per head, this is expected to be a sellout, so if you are wise, you'll get in early.

King George

.....

SPECIAL THANKS

I would like to take this opportunity to say a very heartfelt thanks to the Committee and all Members of the Surf Casting and Angling Club of W.A., for the honour they bestowed upon me by extending Life Membership of the Club. I was unable to respond in the manner I would have wished at the September meeting. Thank you.

George Holman

.....

The Osborne family would like to express their thanks to Tony D'Alonzo, Ron Flynn and crew, and the Tomsitt family for transporting various Osbornes and their gear up the beach on the last field day at White Hills.

A very special thank you to the Tomsitt family who lent us some good strong tent pegs and who (literally) stuck by us throughout that wild and woolly night. Without the ties of friendship (and a strategic hold on their tent) that they so willingly offered, we might have had our first wind-blown look at Kalgoorlie!!

Many thanks to all of you from all of us.

Peter, Sharon, Heather, Christine, Kathy, Julie and Sunny

A.A.A. REPORT:

At the meeting held on Tuesday, 16th September, The Sportsman of the Year was elected. Our George Holman is the Sportsman of the Year for 1979/80 Follower ups were Alan Price and Les Boddington.

The Junior Sportsman of the Year is W. Drage followed by Michael Wise.

The State Rock & Beach Championship is intended to be held around mid-January at probably White Hills.

A new book is available, "Fishes of Australia", price \$10.50. It is good but has some faults in the colour prints. Available from the Museum.

If fishing in the river, keep a look out for a bar tail flathead (has 3 bars) and is tagged.

Snook-Pike may be taken off the minimum size chart as it is not an endangered species.

If you see undersize fish taken, do the right thing and ring the Fisheries Inspector.

Discussed were things like advertising in Restaurants like "Baby Schnapper" and why not have an inspector at the markets when the fish come in.

Now there is something, Shark Bay Schnapper 38cm MIN. LENGTH, Southern Sch pper 28cm. It was resolved that these are two different species. The Shark Bay Schnapper can be caught down to Leeuwin and the Southern up to Leeuwin. At Leeuwin, both can be caught. So be careful, got it!

A.S.

.....

RECORDERS REPORT:

I am very pleased to record 2 more club records and these are listed below.

I hope to see more and more.

I have also received applications for 2 Gamefish badges and one club record. These will be published in the next Reel Talk.

Good fishing,

L. Cook

New Club Records:

Horse Shoe Leather Jacket
1.0kg, Rottnest, B. Waddams, 1980

Yellow Fin Bream
2.5kg, Useless Loop, A. Norman, 1980
